

**"Godzone –
The Frontier of Dreams"**

**(where the dream world and the real
world becomes *One*)**

New Zealand (*Godzone*) National Anthem

God of Nations at Thy feet
In the bonds of love we meet
Hear our voices, we entreat
God defend our free land
Guard Pacific's triple star
From the shafts of strife and war
Make her praises heard afar
God defend New Zealand

Men of every creed and race
Gather here before Thy face
Asking Thee to bless this place
God defend our free land
From dissension, envy, hate
And corruption guard our State
Make our country good and great
God defend New Zealand

Peace, not war, shall be our boast
But, should foes assail our coast
Make us then a mighty host
God defend our free land
Lord of battles in Thy might
Put our enemies to flight
Let our cause be just and right
God defend New Zealand

Let our love for Thee increase
May Thy blessings never cease
Give us plenty, give us peace
God defend our free land
From dishonour and from shame
Guard our country's spotless name
Crown her with immortal fame
God defend New Zealand

May our mountains ever be
Freedoms ramparts on the sea
Make us faithful unto Thee
God defend our free land
Guide her in the nations' van
Preaching love and truth to man
Working out Thy glorious plan
God defend New Zealand

Words by: Thomas Bracken
Music by: John Joseph Woods

If we believe in God, and/or hold any respect for our national anthem, then we must believe in His/Her promise made through the ages, that has been prophesied through all religions ... that He/She has a destiny for mankind ... a destination ... The Kingdom of God (unconditional love) on Earth. It was also prophesied that at the impending time He/She would reveal His/Her plan and that the key to this plan would be a small and supposedly powerless country destined to lead the introduction of a new theocracy to the world. This country would become the light for the rest of the world to follow.

If anyone stops and asks for directions to New Zealand (*Godzone*), then all you need to say is ...

"Look for the kingdom that is far far away
And the first in the world to see the new light of day.
Whose destiny will be unraveled in a series of wonders
To tell of a time when it will carry the world on its
shoulders."

These are both the physical and the spiritual directions to New Zealand (*Godzone*).

"It's not the mountain that we conquer, but ourselves." – Sir Edmund Hillary.

"Along our spiritual journey of awakening and discovery is the realization that there is no separation between our individual inside and outside worlds. As soon as one awakens to this truth then ... it's not the mountain that we conquer, but ourselves."
– David John (DJ) de Cleene.

Executive Summary

Vision

Create New Zealand as “Godzone” – the Frontier of Dreams (where the dream world and the real world becomes *One*)

This *Godzone* strategic plan specifically applies to New Zealand (*Godzone*), however is part of the global *Yellow Brick Road* strategic plan. It has been prepared by the Positive Energy Company (PEC) in order to solve every single one of New Zealand's (*Godzone's*) current problems and consciously lead it into the spiritual reality of life. In doing so, New Zealand becomes *Godzone*, the pilot for the rest of the world to follow that shows the way life could and ought to be; one of unparalleled success, wealth, health, fun, family, unity, love, freedom and unlimited opportunity. New Zealanders (Kiwis) will be able to live the life they've always dreamt of, being the frontier of dreams. It'll be a true heavenly paradise!

Mankind has reached the point where we have explored all existing physical frontiers as much as we possibly can. The next frontier of exploration will be the greatest one yet: the spiritual frontier. This frontier is one of true self awareness, where all things are made possible because there are no borders or boundaries, rules or controls ... except those we make for ourselves. *Windows for People*, a new global theocracy developed by the PEC, opens up this spiritual frontier, the frontier of dreams. It proves that each and every person holds greatness within themselves; unlimited potential and power. *“Our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond measure.”* – Marianne Williamson.

The spiritual frontier is all about becoming increasingly conscious of the unlimited power of our thoughts and emotions in creating our lives. According to *Windows for People*, the Law of Creation (Attraction) is, “The process of our thoughts and emotions (the invisible) manifesting themselves into our physical reality (the visible).” This means that everything we experience in the outside world is a reflection of ourselves, or more precisely, in one way or another is a reflection of what we're thinking or feeling at that moment. This means that each person is the creator of their own unique spiritual world, universe, reality and explains why we see so much so differently. It also means that everything is connected through purpose and synchronicity, there is no such thing as a coincidence.

Surely this is exactly how we would play in a virtual reality interactive game, through our thoughts and emotions. Instead of our present game box technology, which has us steering the game manually from outside the game, we would be in the game and steering it telepathically.

The Law of Creation (Attraction) means that the more we accept responsibility for ourselves and what happens to us in life the more self evident the Law of Creation (Attraction) becomes, the greater our power grows over the outside world and the easier we're able to create anything and everything we could possibly desire in life. Consciousness is simply the awareness of Law of the Creation (Attraction), the ability to see it working all around you. This is why if we had a conscious person standing right next to an unconscious person they would each see completely different realities. The conscious person would see people's thoughts and emotions manifesting in front of them, while an unconscious person would be completely blind to all of this, only seeing random events. Moving from unconsciousness to consciousness is like making a blind person see, making the previously invisible visible. This is why, metaphorically speaking, a conscious person helping to awaken an unconscious person is healing the blind.

As each person awakens to living consciously then so they realise, through their own experiences, that they live in a consciously designed reality; one that has been designed by a higher consciousness that lies far beyond the limitations of mankind. From this awakening comes a flood of awakenings that continuously unveil themselves like magic right in front of your eyes.

Not only does living consciously make the previously invisible visible, but it also makes the previously impossible possible as you awaken to your spirituality, your divinity. As soon as you awaken to living consciously, conscious of the power of your thoughts and emotions in

creating all that exists and happens in your life, then you realize that you are the master story teller, you are both the movie star and director of your movie, you are the gamemaster of your virtual reality game. In the physical world reality we believe that it's what happens in the outside world determines our lives. However, as soon as we awaken to the spiritual world reality then we realize that it's not what happens to us that creates our story, but our interpretation of what happens that is the most powerful thing that creates our story/reality. *"I am determined to be cheerful and happy in whatever situation I may find myself. For I have learned that the greater part of our misery or unhappiness is determined not by our circumstance but by our disposition."* – Martha Washington.

Once you understand this, that you alone have the responsibility to create your life then nothing and no one can deny you success. There's no one to stop you but yourself. More powerful than all the success slogans ever written is the realisation that everyone has but one boss. That boss is you. Success or failure, abundance or scarcity, wealth or poverty? It's all your choice. To state this reality from another angle of perception, the more we blame the outside world for what exists and happens to us the greater the power the outside world has over us and the more we become a powerless victim in life, confined to a life of whinging and wining.

For those people who are uncomfortable with the term "spirituality" and are more comfortable with the usual political and economic jargon, then all that's required is to substitute "spirituality" for the term "social reform/transformation" and "emotional intelligence". At the core of all social reform/transformation required in the world, and what is the basis of emotional intelligence, is the need to take greater responsibility for ourselves and what we create around us based upon the search for love and happiness.

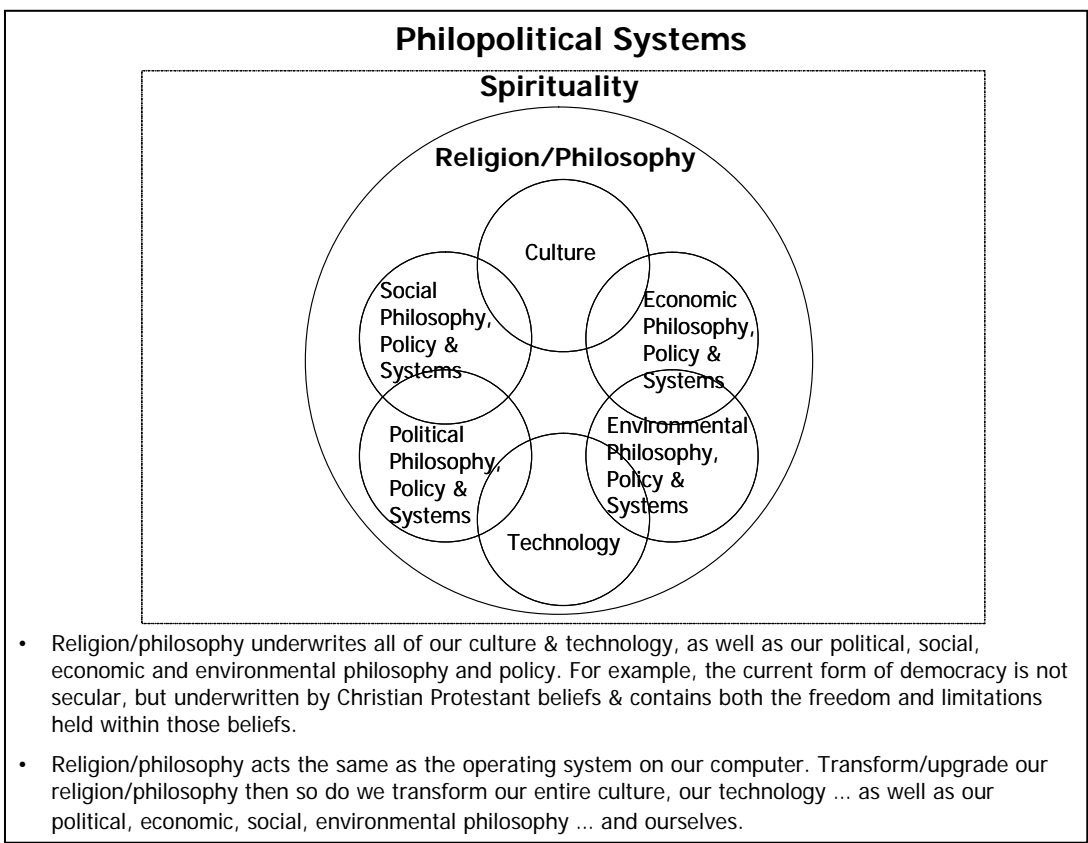

When we look at the world today we could summarize all the problems down to a single one: people living unconscious of the power of their thoughts and emotions and their unwillingness to accept full responsibility for themselves and their creation. This causes them to blame others and try to control the outside world rather than discipline and change themselves, their inside world. *"Everyone thinks of changing the world, but no one thinks of changing themselves."* – Leo Tolstoy. *"No man is fit to command another that cannot command himself."* - William Penn. The difference *The Windows Religion/Philosophy* makes is that it gives everyone greater tools than ever before with which to experience the greater freedom, fun, health, wealth, love and happiness that comes with accepting greater responsibility for themselves. As an increasing number of people accept greater responsibility for themselves the resulting social, political, economic and environmental reforms will follow naturally according to cause and effect. *"To put the world in order, we must first put the nation in order; to put the nation in order, we must put the family in order; to put the family in order, we must cultivate our personal life; and to cultivate our personal life, we must first set our hearts right."* – Confucius. There is no greater form of leadership possible in the world than leading by example. Therefore, the answer is simple. *"Be the way you wish the world to be."* – David de Cleene.

The physical world is a mirror reflection of the spiritual world and so if anyone stops and asks for directions to New Zealand (*Godzone*) then all you need to say is, "Look for the kingdom that's far far away and is the first in the world to see the new light of day. Whose destiny will be unraveled in a series of wonders to tell of a time when it will carry the world on its shoulders." These are both the physical and metaphysical (spiritual) directions to New Zealand (*Godzone*).

Although at first most people may see New Zealand (*Godzone*) as a secular nation and government, the spiritual truth is that it is simultaneously the leading secular and religious nation and government. To understand this we need to understand two things:

1. That religion and philosophy underwrites all political, social, economic and environmental philosophy/policy. Religion/philosophy creates the underlying belief and values system upon which mankind then builds their own set of political values and belief systems. For example, the political philosophy of democracy was actually created and underwritten by Christian Protestant beliefs. Britain became the first modern democracy when it moved from Catholicism to Protestant at the time of the European Reformation. It was very soon after when the Christian Protestants, fleeing from Europe in vast numbers to seek religious freedom, immigrated to North America

- (Newfoundland). The Christian Protestants created the political philosophy of democracy (freedom of speech & religion in its government constitution). It was the religion of Christian Protestantism and the political philosophy of democracy that made the United States the frontier of dreams over the last couple of centuries. The simple philosophical truth is that religion and politics are never separated, it's just that throughout history there are periods of time when this truth is forgotten.
2. The principle of the unity of opposites. On a conscious level, New Zealand is secular because it has a democracy, with the right to free speech and religion, creating equal opportunity for every person (no class system), rather than an autocracy, monarchy or a government whose justice system is administered directly from religious scripture (e.g. in Muslim countries law is administered directly through the Qu'ran). However, on a subconscious level, it is also the most religious of nations because it practises most truly and accurately God's laws and values that run across all religions and philosophies. These laws include "love thy fellow man", "do unto others as you would have them do unto you" and "the equality of all mankind." Compare this to Israel which is consciously the most religious country in the world, but subconsciously a country that is constantly at war.

For a further demonstration of this spiritual truth, since its connection to the rest of the world, when Europeans began to settle in the early 1800s, New Zealand (*Godzone*) has consistently been the world leader in social reform/transformation:

- Was settled by treaty in 1840, rather than conquest, between the Europeans and the native Maori.
- Became the world's first democratic sovereign nation when it was the first country to give women the vote in 1893. Most other countries, notably Britain and USA, didn't give women the vote until after World War I.
- In 1917 Lord Ernest Rutherford welcomed the world into a whole new age, mankind's last new age, the nuclear age, by becoming the first man to split the atom. He is internationally recognised as the "father" of the nuclear age; nuclear physics.
- In the 1930s New Zealand (*Godzone*) was one of the first western countries (along with Germany, Netherlands and Sweden) to introduce the social welfare system into a

democratic, capitalist state, thereby guaranteeing every citizen a minimum standard of living. Most other countries, notably Britain and USA, didn't introduce the welfare state till after World War II.

- In 1985 New Zealand (*Godzone*) was the first and only country to ban nuclear weapons from its shores. By doing so it stood up to a world superpower (and the world), stating that it didn't believe that nuclear weapons were a long term sustainable answer to world peace. Instead, we must search for another way!
- In 2008, with the world awakening to a new spiritual reality, to a spiritual revolution of living consciously (conscious of the power of their thoughts and emotions), it is by a higher design that New Zealand (*Godzone*) will lead this to the world; it is by destiny.

Following this leadership trend in the world's social transformation, it can be seen that it is New Zealand's (*Godzone's*) destiny to be the country that God has chosen in His/Her plan to not only reveal Himself/Herself to the mass consciousness of mankind, but also introduce His/Her universal laws that will reveal the Kingdom of God (unconditional love) on Earth. By doing so the theocracy implemented in New Zealand (*Godzone*), including its practical application in social, economic, political, and environmental transformation, will be held as the example for the rest of the world to follow.

New Zealand (*Godzone*) will become the universal example by being the pilot for the implementation of the new *Windows for People* which operates through God's universal laws alone. By the observation of these laws the theocracy of New Zealand (*Godzone*) will be the persuasive illustration of a new world theocracy, a new world order. It will be a "kingdom of priests and a holy nation" witnessing to all nations. World peace and the solving of every single problem in the world will rest upon the shoulders of such a small and noble nation that's far far away and first to see the new light of day.

New Zealand (*Godzone*) will not only become the spiritual energy centre of the world, but as a further demonstration of how the outside world reflects the inside world, there will be two energy revolutions in the world led by New Zealand (*Godzone*). Our physical energy systems will reflect our spiritual energy systems and so New Zealand (*Godzone*) will also be the centre of the renewable energy revolution.

The power of leading the world through these energy revolutions will also have the flow-on effect of creating New Zealand (*Godzone*) as the business, arts and entertainment, eco and adventure tourism capital of the world. Not only are all these industries ranked amongst the highest added-value service industries possible, but they also positively and ethically contribute towards society and social justice in every way.

By evolving New Zealand's (*Godzone's*) industries from the product oriented rural sector to the service oriented energy sector we literally evolve our economy from a hardware based economy to a software based economy. The culture will evolve accordingly. This ensures not only the explosion of economic development, but that the associated social, political, economic and environmental reform will be driven purely by the Free Will of every New Zealander (Kiwi). This ensures that not only will New Zealand (*Godzone*) become the inspirational leader, the model, that the rest of the world desires to follow, but New Zealanders (Kiwis) really will learn to fly as they themselves become world leaders and stars to shine upon the rest of the world in their respective fields.

Such will be the prosperity of New Zealand (*Godzone*) that it will rival that of Athens, Babylon, Rome and Baghdad during the prime of their respective empires, which by design was also during the pinnacle of their respective religions/philosophies. The Kiwi lifestyle will be one where family comes first, our elderly will be treated as our elders, our environment will be restored to its original glory and abundance of 200 years ago, everybody will be their own boss and there will be no such thing called work since everybody will be involved only in what they love to do.

Awakening to consciousness is awakening to our divinity because as soon as we become aware that we live in a consciously designed world, we awaken to a creator, God. When we become conscious, not only is the existence of God proven through scientific law, but through the direct experience of God by each and every person who awakens to living consciously; living through "The Force" (The Source). This is the revelation of God and the Kingdom of God, of unconditional love, here on Earth.

With the revelation of God, comes the revelation that we are all children of God, heirs to

all that lies in the Kingdom of God. With this comes our divine powers, our super powers. This is how *Godzone* will be the place which brings the dream world and the real world together as *One*. It's as if we'll be going to Hogwarts to become a Wizard, while also learning how to use "The Force" (The Source) and become a Jedi Knight. However, all these talents can't compare to the infinite love we'll feel as we realize we live in a consciously designed fairytale world/universe that's been designed for the purpose of creating the greatest love stories imaginable. This is The Matrix ... Heaven on Earth ... The Neverending Story ... Xanadu ... Disneyland ... Fantasia! And just like Luke Skywalker, it's time for all to enjoy an out of this world adventure that enables us to make the jump to light speed! *"Reach out with your feelings."* – Obi-Wan Kenobi.

Tim Finn – Couldn't Be Done

Send the darkness back to Europe
Waking up in the warm Pacific sun
And when they try to tell us that it can't be done
We've got to prove them wrong
They said it couldn't be done
We had no idea that it couldn't be done
And we needed to find a like-minded someone
Who had no idea that it couldn't be done
It would be best if you went away for a while
And somehow learned to wear a smile
At least these eyes are opened now they are the ones
The bitter tears fell from
When they said it couldn't be done
We had no idea that it couldn't be done
And we needed to find a like-minded someone
Who had no idea that it couldn't be done
No idea it couldn't be done
No idea
When you and I combine
We're coming up from under
In some other state of mind
Filled with a sense of wonder
No idea no idea
Now the coast is clear and the case has been won
And we've lost our fear that it couldn't be done
All we needed a like-minded someone
Who had no idea that it couldn't be done
No idea
Who said it couldn't be done
